Signpost to the IFUs for our IHC products

medac

Dear valued customers,
through the here in this flyer indicated websites of our IHC suppliers you can reach in an IVDR compliant way the most up to date IFUs of all the products medac distributes.
You receive in a quick and easy way product information (e.g. antibody name, clone, isotype, species/host, recommended dilution range and manufacturer) as well as protocols, instructions for storage and regulatory information.
Call up the here on the flyer indicated manufacturer's homepage and enter the product in question into the search field with its name or article number. In case there is no search field available, please look under „products“ for the desired product. You will get access to the IFUs etc. in a pdf format.

www.biosb.com

www.cellmarque.com

On the bottom of the outer packaging of the product and also on the IFU that is enclosed with the product itself (right, upper corner) there is a Key-Code - e.g.

Via the Cell Marque Homepage and after calling up the product in question (with its name or article number) and when entering the on the product printed Key-Code which matches your region in the world you can call up the compatible IFU (e.g. IVD or RUO status varies between different regions in the world).
