

THINK POSITIVE

Positive control slides for immunohistochemistry

medac

Think positive - Positive control slides for

medac offers an extensive array of positive control slides that correspond with the majority of our antibody portfolio.

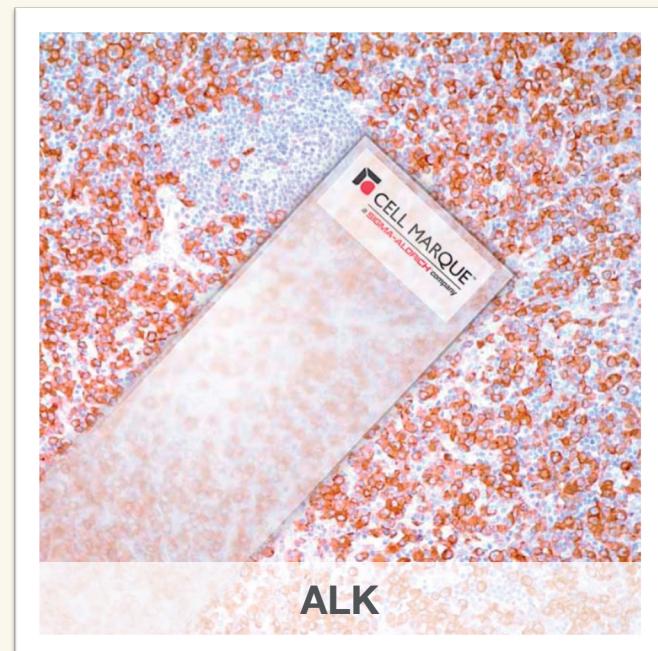

Each tissue block is selected and reviewed by a certified pathologist in order to provide our customers with quality assurance and the best overall experience when testing and validating their antibodies.

The Cell Marque™ control slide portfolio offers:

- FFPE (formalin-fixed paraffin-embedded) human tissues
- Tissue cut optimally at 4µm
- 5 unstained slides per pack
- Guaranteed antigenicity
- Availability of rare and viral infected tissues
- 36 month shelf life
- Increased confidence in antibody performance
- Assistance with validation of new antibodies
- Improved quality control of internal tissue

*5 slides per pack with FFPE human tissue

For all positive controls we offer the corresponding primary antibodies.

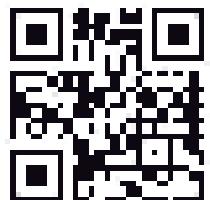

The first three numbers of positive control and corresponding antibody are identical.

An overview of all primary and secondary antibodies can be found on our website:
